Linkedin: <https://www.linkedin.com/in/roham0010>

SUMMARY

I am a **Full Stack Developer** with **10 years of experience** in web development, specializing in **PHP, Laravel, JavaScript, TypeScript, Docker, CI/CD** tools, and cloud technologies like **AWS**. My expertise extends to databases with **MySQL, PostgreSQL, Redis**, and **RDS**, as well as developing complex JavaScript applications. I have **co-founded** projects and **led** development teams, **mentored** and **evaluated** junior developers, and continuously expanded my technical skills. **I am open to remote opportunities and willing to relocate for the right position.**

SKILLS

Languages:	PHP, JavaScript, TS, React.js	Angular.js, Vue.js, HTML5, CSS3
Frameworks:	Laravel	CodeIgniter, Symfony (Aspiring)
Databases:	MySQL, PostgreSQL, Redis	RDS, Firebase, CloudServices
Tools:	AWS, Docker, Jenkins, CI/CD, YAML, Git, PHPUnit, Jira	XDebug, Kubernetes CLI, Linux
Practices:	Agile, SOLID, Design Patterns, RESTful API	GraphQL, MVC, OOP, TDD, CI/CD, Integrations
Exploring:	Java, Python, Node.js	

EDUCATION

Bachelor's Degree in Computer Software Engineering

Sadjad University of Mashhad

2010 - 2014

WORK EXPERIENCES

 **Medical Leave, GymHub (Jul 2023 - Present)** Home

I had Orthognathic Jaw Surgery and after that started GymHub as **Co-Founder** and **CTO** targeting **Gym goers** to **motivate** them **not to quit the Gym** and attend classes.

- **Designed** and **developed** the **RestfulAPI** for the mobile app and wrote feature tests and unit tests.
- Used **GitHub Actions** for the **CI/CD** and created the **production** environment.
- Used **Docker** and **dockerized** the Admin and API projects.
- Automated the creation of the **API docs** using **OpenAPI** Specification(OAS).

 **Full Stack at Artbees, Growmatik (Sep 2020 – Jul 2023)** Remote

Growmatik is a marketing automation platform that helps businesses grow their online presence and sales by personalizing their website, sending emails, showing popups, and many other marketing tools.

- In an **agile** environment, **Mentored and Evaluated Developers, Reviewed Code**, engaged in **Sprint Planning**, did **Pair Programming**, engaged in **CI/CD**, Practiced **TDD**, and contributed to **Retrospectives**, and **User Support**.
- Built and maintained an **email service**(email campaigns) **with AWS SES and SNS** to send emails to 10+ million unique emails, achieving a **bounce** rate of **<0.5%** and a **spam** rate of **<0.03%** with millions of emails sent.
- Designed and implemented Growmatik's core services, **Workflow, Automation, and Simple Rule Engine**, **handling** real-time **execution** of **thousands** of **Automation** and **Workflow's complex big queries**, and increasing customer targeting and stickiness by 30%.
- Accelerated the **JS script engine** for **running** front-end **actions** and **triggers**(popup, page personalization,...) by refactoring it to **decrease size** and **increase speed**.
- Boosted Growmatik customer targeting with **Shopify integration**, increasing our **customers by 35%** in 2 months.
- Doubled customers by **integrating** Growmatik with services like **AWS, WP, Stripe, HubSpot, SparkPost, DKIM and SPF authorizations, GSC, GDS, FB**, and more, expanding the platform's functionality and compatibility.
- **Estimated** and **Delivered** tasks **by deadlines**, filled reports, and attended **everyday stand-up** meetings.

Co-Founder, CTO at Googsell, Emenu (Jun 2017 – Jan 2020)

On-site

Googsell and Emenu were online platforms that aimed to create online stores for Instagram shops and QR code menus for restaurants and coffee shops by integrating with Instagram API (Both were shut down after Instagram filtering in Iran).

- **Ranked top 5** for the best online **store** out of **4000 participants** in the Iran Web and Mobile [Festival in 2017](#).
- Managed the team to establish the main **Instagram API integration** for Googsell.com and Emenu.io, integrating the pages and converting them to websites with only 5 clicks.
- Grew Googsell to **over 500 Instagram shops** in the first years.
- **Led, Designed Solutions, Reviewed Codes, and Debugged** code using various tools and technologies.

Full Stack/Senior Developer at 2nabsh.com (Jun 2015– Dec 2017)

On-site

2nabsh is one of the biggest realtor SaaS apps in Iran, that provides online platforms for real estate agents and buyers.

- Planned and collaborated in **project migration** from pure **PHP to Laravel 5.5**, and automated the database conversion, **saving 50% time**.
- Created a **web crawler** that identified and integrated new properties from our contractors, resulting in a **decrease in realtor bounce rate**, also **increasing Google click rate by 15%**.
- Built part of the **OAuth 2** with Laravel Passport on Restful API and **integrated realtors' websites**.

Software Engineer at Dayamooz.com Company (2014-2015)

On-site

Daya is the biggest educational social media and gamification learning app in Iran, that helps students learn and interact with each other online.

- As a back-end developer, worked part-time at Daya company on their **microservices for the mobile app**.
- I also learned **Java Spring**, and **Hibernate** to work needed for a **RestAPI** part of the project.

Co-Founder, Backend Developer at Espida.net (2013-2014)

On-site

Espida.net was a company that provided software and network services to various customers. I developed a **Custom CMS** in PHP to develop and maintain our projects.

- We **provided software** to various companies, such as **staff attendance** for a military base, a **tourism website** for a municipality organization, **CRM** for a hardware recovery store, and a **support tracking system** for a computer accessory shop.

FullStack Developer at Freelancer

On-site, Remote

A short list of freelancing work that I have done during my whole career, I have mostly used Jenkins and Github Actions for CI/CD, Sometimes dockerized projects, and always asked and suggested writing tests.

- Serverless **Payment and Staff Management APP** with React Native and Firebase.
- API for a **Car Parking Finder** project by React Native and the Lara GPS Device using Java Spring and Hibernate.
- Assembled a fully-fledged **Cryptocurrency Trading** website.
- Refactored and expanded a **Telegram Bot API** marketplace with tens of menus and actions, increasing the user base of the bot to over 200K and handling millions of user requests per month with a simple VPS.
- Free and open-source **Chrome extension** that shows new Persian poems via push notification.
- Some others: Established a **Lottery website** and support of **municipality tourism website**.

Languages: Conversational English, fluent Persian, and exploring Deutsch.

Hobbies: Futsal, Volleyball, Pingpong.

Soft Skills: Strong problem-solving, Multi-tasking, [Lazyness](#), Easily adopting new technologies, Fast learning, MVP-oriented if necessary.
